WELCOME ADDRESS

Dear Colleagues and friends,

It is a distinct honour to welcome you to the joint event co-organised by PROGRAMMING (PROMoting GeRIatric Medicine in countries where it is still eMergING) COST Action 21122 and the Global Europe Initiative (GEI) group of the European Geriatric Medicine Society-SPRIN-G which will be organized in Zagreb on June 16-18th, 2026.

*This year's meeting, entitled **Building geriatric medicine in emerging health systems: from concept to implementation of person-centred care** will be the 5th Sprin-G annual interdisciplinary educational event developed by the GEI, as well as a milestone scientific encounter for PROGRAMMING COST Action, which is approaching to its end.*

Following a first day focused on PROGRAMMING meetings, when the main scientific outputs of the Action will be presented and reviewed (16/6), the open conference part of the program (17th of June) is designed to help bridge the gap between theoretical geriatric principles and the practical realities of developing healthcare systems. We will explore how to transition from traditional, disease-oriented models to a holistic approach that prioritizes functional ability and the individual values of older adults. We will focus on the conceptual framework of ageing in countries with emerging economies, clinical excellence in managing geriatric syndromes, and the implementation science required to integrate these assessments into existing support structures despite resource constraints.

We envision this event as more than just a series of lectures. It will be a collaborative forum where we encourage local audience and stakeholders to discuss national challenges, engage in rigorous debate, and network with international experts. We hope that the insights gained here will serve as a catalyst for meaningful change, ensuring that person-centred geriatric care becomes a lived reality for older adults in our communities.

We look forward to hosting you in the Croatian capital and to the advance we will achieve together.
